Professional Summary

Senior SDET and QA Lead with 10 years of experience in test automation, QA leadership, and CI/CD quality engineering for enterprise and SaaS products in insurance, oil and gas, CRM, and property management. Builds E2E, API, and mobile automation frameworks from scratch using Playwright (TypeScript), Selenium (Java), Cypress, and Appium, and integrates them into GitHub Actions, Azure DevOps, and Bitbucket pipelines. Led QA teams, mentored engineers, and defined test strategies and shift-left practices in Agile/Scrum teams. Currently applies AI-augmented testing (Playwright MCP, Playwright Agents, agentic test automation) to test generation, self-healing locators, and coverage optimization.

Technical Skills

Test Automation: Playwright (TypeScript), Selenium WebDriver (Java, Python), Cypress (TypeScript), Appium (Java), Maestro, Detox, Katalon Studio, Robot Framework (Python), BrowserStack

API Testing: Playwright APIRequestContext, RestAssured, Postman, GraphQL, REST, contract testing, schema validation

Frameworks and Patterns: Cucumber (BDD), TestNG, Page Object Model (POM), Arrange-Act-Assert (AAA)

CI/CD: GitHub Actions, Azure DevOps, Jenkins, Bitbucket Pipelines, AWS

AI-Augmented Testing: Playwright MCP, Playwright Agents, agentic test automation, AI-assisted test generation, self-healing locators

Programming Languages: TypeScript, JavaScript, Java, Python, Groovy, SQL

Test Management and Collaboration: Jira, Zephyr, TestRail, Confluence, Figma

Observability: Datadog, Splunk, Azure Monitor

Methodologies: Agile/Scrum, SDLC, STLC, shift-left testing, BDD, test strategy and test planning

Professional Experience

Co-Founder and Founding Engineer

Salendar | Philippines (Remote) | Aug 2026 – Present

Consumer mobile app, startup

- Co-founded Salendar, a mobile app that shows the sales happening nearby, saves the ones you follow, and reminds you before they end.
- Built the marketing website (salendar.ph) in Next.js (TypeScript) and deployed it on Vercel.
- Building the iOS and Android app in Flutter (Dart) with Riverpod and OpenStreetMap maps, opening soon in Metro Manila.

Principal QA Automation Engineer

ComChamp | Netherlands (Remote) | Jun 2025 – May 2026

Sales CRM, multi-tenant SaaS

- Architected an E2E and API test automation framework from scratch in Playwright (TypeScript), covering UI and API layers, and integrated it into GitHub Actions CI/CD.
- Built API test suites with Playwright APIRequestContext covering REST endpoint validation, contract testing, authentication flows, and schema assertions.
- Defined the QA strategy, test plans, and shift-left testing practices with the technical lead.
- Applied AI-augmented testing (Playwright MCP, agentic test automation) to test generation, self-healing locators, and coverage optimization.
- Standardized test design patterns (POM, BDD), coverage metrics, and automation reliability practices across the codebase.
- Delivered releases, working with developers and product stakeholders.

- Performed exploratory and cross-platform manual testing to find defects early in the SDLC.

Senior Software Test Engineer (SDET)

FPT Software | Hanoi, Vietnam | Apr 2024 – Jun 2025

Client: IAG Limited, Australia (banking and insurance)

- Built and maintained test automation frameworks in Playwright (TypeScript) and Selenium (Java) with Cucumber (BDD), integrated into GitHub Actions CI/CD.
- Configured and optimized GitHub Actions workflows, improving pipeline reliability and test feedback speed.
- Enforced test design patterns, coding standards, and QA best practices across the team.
- Executed functional, regression, smoke, and exploratory testing across web and API layers.
- Managed defects in Jira and maintained STLC documentation and test artifacts in Confluence.

QA Team Lead

FPT Software | Hanoi, Vietnam | May 2022 – May 2024

Client: Petronas, Malaysia (oil and gas)

- Led the QA team: mentored junior QA engineers, ran technical interviews, and set team-wide QA standards.
- Built and maintained automation frameworks in Katalon Studio, Selenium (Java, Groovy), and Playwright (TypeScript) with Cucumber (BDD), integrated into Azure DevOps CI/CD.
- Estimated, tracked, and reported STLC progress in Jira and Zephyr to keep releases on schedule.
- Coordinated feature planning and releases with developers, product owners, and business stakeholders.
- Executed functional, regression, and API testing and managed the defect lifecycle.

QA Engineer (Part-time, Remote)

ManageCasa | San Francisco, USA (Remote) | Oct 2024 – Feb 2025

Property management SaaS

- Developed and maintained a web and API automation framework in Cypress (TypeScript), integrated into Bitbucket Pipelines with AWS.
- Performed manual and automated functional and regression testing across application layers.
- Tracked defects in Jira and maintained test documentation in Confluence and Figma.

QA Engineer

Arcanys | Cebu, Philippines | Apr 2021 – Apr 2022

- Built a web automation framework in Selenium (Java) with Cucumber (BDD).
- Developed a mobile automation framework for Android and iOS in Appium (Java), integrated with BrowserStack.
- Designed test cases, feature lists, and test scenarios, and ran regression and functional cycles for web, API, and mobile.
- Tested web and mobile features in an Agile process.

Software Test Engineer

Azeus Systems Philippines Ltd. | Manila, Philippines | Nov 2016 – Apr 2021

- Designed test strategies and test plans for product enhancements across web, API, mobile (Android, iOS), and desktop.
- Mentored new QA engineers on test coverage and technical skills.
- Clarified requirements and resolved design issues early in the SDLC with developers and designers.
- Executed unit, integration, system, functional, smoke, sanity, compatibility, ad-hoc, and regression testing.

Education

Bachelor of Science in Industrial Engineering

University of the Philippines Diliman | 2016
